Experience

JUNE 2022 – PRESENT
AppUnite, Senior Front End Developer

At AppUnite, I work on the development of front-end solutions for the eCommerce segment of a platform for anglers with +15 million users. I am responsible for application development, refactoring and holding expert calls with stakeholders.

In addition to my core responsibilities, I actively contribute to enhancing business processes, as well as implementing AI-driven solutions to streamline internal communication within the company. Furthermore, I provide advisory support to other teams in product development, sharing insights and guidance to propel their projects forward.

MAY 2022 – MAY 2023
Media Scope Group, Software Engineer

At Media Scope Group, I was responsible for implementing full-stack solutions in web technologies (React, NextJS, NestJS), as well as supporting business clients in maintaining WordPress-based solutions. I was also involved in graphic design, where I created designs and branding. I held business calls with international clients (China, South Korea, Estonia, Switzerland) to determine their business requirements and advise on development solutions.

JUNE 2022 – DECEMBER 2022
RestaurantClub, Lead Front End Developer

At RestaurantClub, I led the front-end team and was responsible for implementing the MVP of the new version of the app for the most popular restaurant festival in Poland. I implemented modern development guidelines and code architecture of the application, and delivered technology solutions in React. I mentored juniors and interns in the team, helping them grow in the industry.

AUGUST 2020 – APRIL 2021
Vitresoft, Front End Developer

During my time at Vitresoft, I implemented front-end solutions in React and designed low-fidelity designs in Figma. I realized a product website for a project in the entertainment industry, which had exposure among the biggest Polish influencers and served tens of thousands of users.

JULY 2020 – AUGUST 2020
PayTicon, Front End Developer

At PayTicon, I was involved in the MVP implementation of a FinTech eCommerce product using React and Gatsby technologies. Throughout the project, I collaborated with a team of developers and designers to meet the client's requirements and deliver a high-quality product. Additionally, I actively participated in code reviews and testing processes to maintain code integrity and identify any potential bugs or issues early on.

As a driven entrepreneur, I have successfully founded and scaled startups alongside my main passion for programming, leveraging my skills to create innovative solutions and fuel the growth of these ventures.

AUGUST 2021 – MAY 2023
Sociometrics, Co-Founder

At Sociometrics Foundation, I held the role of Co-Founder and member of the Foundation Board. I was responsible for the process of product vision creation and its implementation, as well as relations with partners and customers. I developed a number of solutions for the AdTech and NGO sector, which shared an innovative and modern approach to product implementation.

JULY 2018 – PRESENT
myPolitics, Founder

I created the most popular Polish medium of the young generation and the most popular platform for political education through quizzes. As part of the project, I developed IT solutions for the media and AdTech industry, designed and implemented work automation solutions, including content generation and publication. I've managed to create this product from A to Z, developing front-end, back-end, design solutions and algorithms analyzing questionnaires.

Also, I managed a team of developers and journalists, planned the team's work and distributed roles in a holacracy methodology. I designed the branding, design and implemented most of the project's technology solutions.
