Experience

JUNE 2022 – PRESENT
AppUnite, Senior Front End Developer

At AppUnite, I work on the development of front-end solutions for the eCommerce segment of Fishbrain, a platform for anglers with +15 million users. I am responsible for application development, refactoring and holding expert calls with stakeholders.

In addition to my core responsibilities, I actively contribute to enhancing business processes, as well as implementing AI-driven solutions to streamline internal communication within the company. Furthermore, I provide advisory support to other teams in product development, sharing insights and guidance to propel their projects forward.

MAY 2022 – MAY 2023
Media Scope Group, Software Engineer

At Media Scope Group, I was responsible for implementing full-stack solutions in web technologies (React, NextJS, NestJS), as well as supporting business clients in maintaining WordPress-based solutions. I was also involved in graphic design, where I created designs and branding. I held business calls with international clients (China, South Korea, Estonia, Switzerland) to determine their business requirements and advise on development solutions.

JUNE 2022 – DECEMBER 2022
RestaurantClub, Lead Front End Developer

At RestaurantClub, I led the front-end team and was responsible for implementing the MVP of the new version of the app for the most popular restaurant festival in Poland. I implemented modern development guidelines and code architecture of the application, and delivered technology solutions in React. I mentored juniors and interns in the team, helping them grow in the industry.

AUGUST 2020 – APRIL 2021
Vitresoft, Front End Developer

During my time at Vitresoft, I implemented front-end solutions in React and designed low-fidelity designs in Figma. I realized a product website for a project in the entertainment industry, which had exposure among the biggest Polish influencers and served tens of thousands of users.

As a driven entrepreneur, I have successfully founded and scaled startups alongside my main passion for programming, leveraging my skills to create innovative solutions and fuel the growth of these ventures.

JULY 2018 – PRESENT
myPolitics, Founder & CEO

I created the most popular Polish medium of the young generation (+ 7.5 million video views in 2021-22) and the most popular platform for political education through quizzes (+1.2 million completed questionnaires).

As part of the project, I developed IT solutions for the media and AdTech industry, designed and implemented work automation solutions, including text generation, graphics generation and fan communication. I managed a team of developers and journalists, planned the team's work and distributed roles in a holacracy methodology. I designed the branding, design and implemented most of the project's technology solutions.

The project was covered in the Polish mainstream media (such as Polsat News, Onet, wPolityce) and had exposure in popular Polish influencers and politicians

AUGUST 2021 – MAY 2023
Sociometrics Foundation, Board Member

At Sociometrics, I held the role of Co-Founder and member of the Foundation Board. I was responsible for the process of product vision creation and its implementation, as well as relations with partners and customers. I developed a number of solutions for the AdTech and NGO sector, which shared an innovative and modern approach to product implementation.
